# Nergy Sense Cloud

- Hands free monitoring system
- No configuration.
- Supports all Nergy Sense sensors.
- Easy access to energy usage data from any smart device (phone, tablet, laptop)
- Minimal data transfer from site to cloud - reduces implementation cost.
- Pay as you go subscription model limits initial investment.
- Automatic data storage for the life of the battery

Nergy Sense Power Usage and Lifetime sensors feature support for Nergy Sense Cloud reporting.

Any sensor can be quickly added to the cloud reporting solution with the addition of a communications gateway and cloud configuration.

Nergy Sense Cloud is a low cost, subscription service. Pay for only the service you need.

Sensors store data locally for a period of up to six months. When cloud reporting is active, all data is transferred to the cloud server, extending detailed data recording to the full battery lifetime.

Powerful reporting software is available on demand via any modern web browser, on any device. Review usage of your fleet from you phone, tablet or PC!

Push capabilities are available to transmit critical data, alerts or summary reports to authorized users via email or text message. Eliminate data overload by showing only key data to those who need it.

Data transfer from your site to the cloud can be done via a corporate network, or via a cellular connection. Data usage is low, Thanks to patent pending Nergy Sense software designs.

Reliability and accuracy exceeds competing systems due to the robust Nergy Sense architecture, which eliminates onsite configuration.

Nergy Sense Cloud Reporting enables enterprise-wide effciency gains. Compare performance at different sites, identify best practices, and isolate problems before they become widespread.
